RISK TOLERANCE

1. Risk Factor

Before you make a decision on any investment, you need to consider how you feel about the prospect of potential loss of principal. This is a basic aspect of investing: The higher return you seek, the more risk you face. Based on your feelings about risk and potential returns, your goal is to:

- Potentially increase my portfolio's value as quickly as possible, while accepting higher risk. (15 pts.)
- Potentially increase my portfolio's value at a moderate pace, while accepting moderate to high risk. (9 pts.)
- Primarily generate income, with capital appreciation as a secondary goal. (6 pts.)
- Take as little risk as possible with my investment principal. (3 pts.)

2. Investment Approach

Which of the following statements best describes your overall approach to investing as a means of achieving your goals?

- I am seeking a relative level of stability in my overall investment portfolio. (3 pts.)
- I am attempting to moderately increase my investment value, while reducing potential loss of principal. (6 pts.)
- I am pursuing investment growth, accepting moderate to high risk levels and principal fluctuation. (9 pts.)
- I am seeking maximum long-term returns, while accepting maximum risk with maximum principal fluctuation. (15 pts.)

3. Volatility

The value of most investments fluctuates from year to year, as well as over the short term. How would you feel if an investment you had committed to for 10 years lost 20% of its value during the first year?

- I would be extremely concerned, and would sell my investment. (1 pt.)
- I would be concerned, and may consider selling my investment. (3 pts.)
- I would be concerned, but I would not consider selling my investment. (5 pts.)
- I would not be overly concerned, given my long-term investment philosophy. (7 pts.)

4. Variation

Realizing that market-based investments may move up or down in value over time, with which of the hypothetical portfolios and volatility of hypothetical returns shown below would you feel most comfortable?

	Year 1	Year 2	Year 3	Year 4	Year 5	Average	
<input type="checkbox"/>	3%	3%	3%	3%	3%	3%	(1 pt.)
<input type="checkbox"/>	2%	5%	6%	0%	7%	4%	(2 pts.)
<input type="checkbox"/>	-6%	7%	21%	2%	8%	6%	(3 pts.)
<input type="checkbox"/>	9%	-11%	26%	3%	18%	9%	(4 pts.)
<input type="checkbox"/>	14%	-21%	40%	-4%	31%	12%	(5 pts.)

5. Investment Experience

What is your overall knowledge of investments?

- Low:** I have very little investment experience outside of bank savings accounts, money market funds and certificates of deposit . (3 pts.)
- Medium:** I have some experience investing in mutual funds or individual stocks and bonds. (6 pts.)
- High:** I have been an active participant in the stock market, and understand that all investments, including international markets, can be volatile and unpredictable. (9 pts.)

6. Time Horizon

An important consideration when making investment decisions is where you are in your financial life cycle and how long you have before you will need to start withdrawing retirement assets. Please indicate the portfolio time horizon you believe is appropriate. A multistage time horizon would indicate that you have several goals in the future that may require withdrawals at different times, which your investment portfolio needs to address.

Examples:

Short time horizon: I need to begin withdrawing funds in three years for college.

Long time horizon: I need to begin withdrawing funds in 12 years at retirement.

Multistage time horizon: I need to withdraw some funds in five years for a home purchase (secondary goal), and then withdraw remaining funds in 25 years for retirement (primary goal).

- Short time horizon** (one to four years) (1 pts.)
- Long time horizon** (more than five years) (3 pts.)
- Multistage time horizon** (5 pts.)

7. Primary Goal

Please indicate approximately how many years from today you expect to reach your primary goal.

- Within one to four years (1 pt.)
- Within five to 10 years (3 pts.)
- Within 11 to 20 years (5 pts.)

Due to its fixed income nature, general stability of principal value should be obtained, but is not guaranteed.

12 –29 points

Income with Moderate Growth

Low to Moderate

You have selected an Income with Moderate Growth objective for your account. This objective emphasizes current income through a large allocation to fixed income securities, complemented by a secondary consideration for capital appreciation through a small allocation to equity securities.

30 –49 points

Balanced

Moderate

You have selected a Balanced objective for your account. This objective is designed to offer the potential for both capital appreciation and current income through a roughly 50% allocation to equities and approximately 50% allocation to fixed income investments.

50 –66 points

Balanced Growth

Moderate to High

You have selected a Balanced Growth objective for your account. This objective is designed to invest a substantial portion of assets in equities for potential growth, while using fixed income to moderate risk. The expected asset allocation for this objective is approximately 70% equities and approximately 30% fixed income.

67 –83 points

Growth

Moderate to High

You have selected a Growth objective for your account. This objective is designed to invest the majority of assets in equities for potential growth, while using fixed income to provide a small buffer to fluctuation, and a small amount of current income. The expected asset allocation for this objective is approximately 85% equities and approximately 15% fixed income.

84 –100 points

All Equity

High

You have selected an All Equity objective for your account. The primary goal of this portfolio is long-term growth and maximum capital appreciation. The portfolio consists of 100% equity investments.
